

Global Dialysis is used by many American citizens every day to help them locate travel dialysis centres for vacations and business travel.

Anything is possible really and we've helped people do almost every trip you can imagine, to every corner of the globe. Many people find their own hotels and accommodation, we often work in partnership with travel agents in planning trips so that this worry and stress is taken away from dialysis patients and their families.

Medicare will pay for dialysis in the U.S. and its territories (American Samoa, Guam, Puerto Rico, Saipan and the U.S. Virgin Islands), but not outside the U.S. Other insurance agencies will cover the cost, sometimes you'll need to pay for this yourself and claim it back later. If in any doubt at all we strongly advise you take to your insurance company before you travel and agree exactly what they will cover in writing.
