

for everyone!

SARONIC NEPHROLOGICAL CENTER

In the area of Kipseli, and at a distance of only five minutes from the ports of Aegina and Souvala, we've opened a modern dialysis center with the objective to offer anthropocentric therapeutic services that cover all types of sessions such as hemodialysis and hemodiafiltration.

The center consists of **ten (10) B. Braun latest technology dialysis units**, and the necessary infrastructure that is required by applicable laws. Our well-trained staff is a guarantee of security and care, and our first commitment is our patient's needs.

Our goal is the fulfillment of high quality dialysis sessions to renal patients who have a permanent residence on the island, and to visitors who will choose Aegina as their holiday location or weekend getaway from the big urban cities.

Moreover, in cooperation with travel agencies that operate in Athens and Aegina, we are always ready to offer our help so that patients may better organize their travel time periods and itinerary. It's geographical position allows patients the opportunity for daily trips to the nearby islands of **Agkistri, Poros, Hydra, Spetses and also the archaeological area of Epidavros.**

Medical Director:
Dr. Manolis Logothetis

Head Nurse:
Niki Dimitrakopoulou
